

List of Over 70 Diseases and Injuries that May Be Treated or Cured by Stem Cell Research

Autoimmune Diseases/ Musculoskeletal/ Connective Tissue Disorders

Arthritis	TOTAL: 73
Crohn's Disease	
Devic's Syndrome	
Multiple Sclerosis	
Osteoporosis	
Systemic Lupus Erythematosus (Lupus)	
Systemic Sclerosis	
Type 1 Diabetes	

Cancers

Bladder	17
Brain/Central Nervous System	
Breast	
Colon/Lower Bowel	
Endometrium/Cervix/Ovary	
Esophagus	
Kidney	
Leukemia	
Liver	
Lungs/Respiratory System	
Lymphoma	
Myeloma	
Oral Cavity	
Pancreas	
Prostate	
Skin	
Stomach	

Cardiovascular Diseases

Acute Ischemic Heart Disease (angina)	5
Myocardial Infarction (heart attack)	
Chronic Ischemic Heart Disease (atherosclerotic heart disease)	
Cardiomyopathy	
Cerebrovascular Disease (stroke)	

Circulatory/Respiratory Diseases

Chronic Obstructive Pulmonary Disease	2
Pulmonary Fibrosis	

Injuries

Severe Burns	3
Shaken Baby Syndrome	
Spinal Cord Injury	

Eye Disorders

Macular Degeneration	2
Retinitis Pigmentosa	

Infectious Diseases

HIV/AIDS 1

Metabolic Diseases

Adrenoleukodystrophy
Aspartylglycosaminuria
Canavan's Disease
Cystic Fibrosis
Fabry Disease
Fucosidosis
Gaucher Disease
Leukodystrophy
Mucopolysaccharidoses
Niemann-Pick Disease
Pompe Disease
Porphyria
Sickle Cell Disease
Tay-Sachs Disease
Type 2 Diabetes 15

Muscular Dystrophies

Becker
Duchenne
Emery Dreifuss
Facioscapulohumeral
Fukuyama
Limb Girdle
Myasthenia Gravis
Myotonic Dystrophy 8

Neurological Diseases of Adulthood

Alzheimer's Disease
Huntington's Disease
Lou Gehrig's Disease (ALS)
Parkinson's Disease 4

Neurological Diseases of Childhood

Asperger Syndrome
Autism
Cerebral Palsy
Childhood Disintegrative Disorder
Down Syndrome
Epilepsy
Hydrocephalus
Rett Syndrome 8
